2 Release Notes

There is a release of the ISWC database software planned for Tue, 17th February @ 11AM CET. The expected service interruption for the production release is three hours.

The purpose of this release is to introduce some new features. It also contains miscellaneous minor bug fixes. This release does contain a REST API change so if you integrate directly with the REST API you should consider a quick smoke test in UAT. More details on this change are listed in section 2.4 Features below.

2.1. Communication

These release notes are now finalised. A copy of these release notes will be emailed to all email addresses that have an active subscription to the REST API in production as follows:

To get the latest API definition use the API definition button in the developer portal as per the figure below.

The screenshot shows the ISWC Network developer portal interface. At the top, there is a navigation bar with links for Home, APIs, Products, About, Reports, Profile, and Sign out. Below the navigation bar, the page title is "ISWC Database REST API - Agency". On the left side, there is a search bar and a "Group by tag" toggle. The main content area displays a list of API operations with their methods (POST, GET, DEL) and descriptions. A "Try it" button is visible next to the "Add a batch of new ISWC submissions to the database" operation. On the right side, there is a "Contact" section with the email address "iswc.support@cisac.org" and a "Request" section.
